

# THE MANIFESTO

It's time to wake up!

The era is ending when being a man and a woman isn't enough to get a job—and they call it 'equality'.

Those times are over when biological men torture women in the ring—and they call it 'sport'.

The days are gone when men in women's dresses go to the toilet with our daughters—and they call it 'normal'.

No more waiting.  
No more silence.

AllTwoGenders steps up.

## \$TWO

FIRST BINARY SOCCOIN

**TWO GENDERS. ONE CRYPTO. ZERO COMPROMISE.**

## MISSION & THE PROBLEM \$TWO FIGHT AGAINST

We're standing at the edge of disaster. Economies are collapsing, systems are failing, and today's so-called "innovations" are nothing but recycled failures. The trendy "transgenderism" isn't progress—it's a direct highway to chaos.

### **That's why \$TWO exists.**

Not just another token. A weapon against absurdity.  
A cryptocurrency that reminds the world: two genders aren't an opinion. They're reality.

### **\$TWO isn't just a meme.**

\$TWO is a global network of people who refuse to be silenced.

We're building an ecosystem where common sense isn't a crime.  
We fund real initiatives that support future generations instead of feeding them a circus.

### **What we're fighting against.**

Look around. What's happening?  
Financial systems are crumbling.  
Education is turning into a factory of fools.  
People are forced to accept lies—or be silenced.

### **The facts don't lie:**

- 70% of people don't trust banks and traditional finance. (Source: Industry Research Report)
- 85% of crypto projects don't solve real problems—they just ride the hype. (Source: Global Fintech Report)

\$TWO is not another token.  
\$TWO is the antidote.  
\$TWO is the financial revolution that fights collective insanity.

## \$TWO VALUES

Enter \$TWO—**Ethereum-powered** cryptocurrency designed to restore sanity.  
This isn't just another digital asset; this is the frontier where finance meets ideology.

\$TWO is more than a token. It's a movement reclaiming the future from the hands of chaos.  
This isn't about speculation—this is about building a new reality where common sense prevails.

### **We're fighting for family, for children—for a future we can be proud of.**

Our mission is simple: we fund real education, real development, and real progress.  
Not propaganda. Not distortion.  
Only the foundations of a thriving society.

### **The World is Shifting.**

- 1,500% increase in crypto adoption over the past 5 years.
  - Blockchain investments have quadrupled within the same period.
  - 68% of investors prioritize family values and long-term stability.
- (Source: Blockchain Industry Review)

### **Values: Two Genders, One Crypto, One World.**

We don't apologize for being binary—we embrace it.  
Progress exists because of contrast. Strength comes from opposition.  
\$TWO is the only cryptocurrency that stands for something real.

In a world drowning in confusion, we bring back clarity.  
Family, truth, and a future that won't be sold to fake ideals.  
We're not just riding the wave.  
The future won't write itself. We're building it—block by block.

## WHY \$TWO BE DIFFERENT?

### COMMON SENSE—NOW ON THE BLOCKCHAIN.

AllTwoGenders (**\$TWO**) isn't just another meme coin.

It's a crypto hammer that's going to shatter the postmodern nonsense into a million splinters.

It's a symbol of common sense, biological reality, and the fight against the fake narratives running wild today.

We're not offering some investment tool for the gullible.

We're offering a chance to join a re-evolution that will shake financial markets and redefine the future.

### The purpose of \$TWO?

To bring **binary genders** back into society—sing blockchain, the ultimate **binary technology**.

Pretty ironic, right?!

But this is more than just irony. We are here to fight against a system that destroys the future by feeding people absurdity instead of reality.

We will not let "them" turn the world into a circus of genderless puppets!

### We don't just "believe" in two genders. We know it.

Because it's the very foundation of biological evolution, encoded in **DNA**.

Yes, modern discussions about gender identity may exist within the framework of social sciences, but this cannot erase the reality confirmed by genetics, medicine, and human history.

Let's be real:

We think gender dysphoria should be addressed as a mental health issue rather than through medication or surgery.

Well, you get the point.

## \$TWO ADVANTAGES

### Why \$TWO is unstoppable?

We dare to risk it all because we know one truth: **binary thinking built this world.**

From nature to technology, everything relies on two forces, two choices, two paths.

And \$TWO embodies this fundamental reality.

But this isn't just ideology—it's **strategy.**

We leverage AI and market analytics to anticipate trends, outmaneuver hype, and dominate the space.

### The path to mass adoption.

\$TWO isn't just another meme coin—it's a **financial revolution.**

From intellectuals to everyday people, from traders to tech pioneers—the **binary truth spreads.**

### Why \$TWO is the next big thing?

- **It's not a token. It's a movement.**

Common sense is a rare asset in today's world, but we're bringing it back—on the blockchain.

- **Universal demand.**

People everywhere are sick of the lies. \$TWO is their financial weapon.

- **Memes are evolving.**

The internet has shifted—"the joke" is over. Now comes the punchline.

- **Viral expansion.**

A thriving community will drive exponential growth, fueling real adoption.

### Meet the Team. Or don't.

Anonymity is our superpower.

No names. No faces. Just **He, She, and an unstoppable force of nature.**

Our expertise spans finance, marketing, psychology, and tech—**not to impress, but to win.**

So, are you with us, or are you still stuck in that circus?

On the eve of unlocks, all key funds will be moved  
to battle-tested 3-of-5 multisig safes,  
requiring multiple trusted signatures for any move.

No single entity controls them.  
No backdoors.  
No shady tricks.

And as we grow, the community may claim its seat at the table.  
Because true power belongs to those who stand the test of time.

### **On-Chain Analytics & Public Monitoring.**

Wallet addresses will be published exclusively on the official **alltwogenders.io**.  
A real-time dashboard tracking every \$TWO move is coming.

### **External Audit & Oversight.**

To back up our words with proof, we will invite an independent auditor or respected industry expert to assess  
whether our team is truly honoring our promises.  
Who will this advisor be? You decide.

And if no one steps up? We'll hunt down a name that even skeptics trust.  
We'll nominate a crypto analyst, researcher, or independent investigator.  
3-6 months post-launch, the selected auditor will publish a transparent report on how \$TWO funds are handled.

This is radical transparency.  
This is accountability.  
This is **\$TWO**.

## \$TWO COSMO — COMFORTABLE, OPTIMIZED, STABLE MARKET OPERATIONS

### \$TWO COSMO — Comfortable, Optimized, Stable Market Operations.

For the first 20 days, we activate **FairTradeLimit**:

- No one can buy more than **1% of the pool** on Uniswap.
- No one can sell more than **1% of their balance** in a single transaction.

**Why?** Because we're not playing games. No pump-and-dump, no sudden crashes.

We eliminated manipulation at launch.

Your holdings are safe from dirty whale tricks.

Everyone gets a fair shot — buy and sell only in reasonable amounts.

### **Equal rules for everyone.**

Men, women, whales, small investors, rookies, and seasoned traders—**all on equal ground**.

This is a real market with high ethical and security standards, where price growth is driven by organic demand, not market manipulation.

### **Protecting new investors.**

Crypto can feel like a battlefield.

One misclick, and you're wrecked. One panic move, and you're out.

**Not here.** We make sure you start with armor.

Our strategy **eliminates common mistakes** new investors make, reducing risks and creating a safe, educational space for everyone.

### **Forget FOMO. This is COSMO.**

Comfortable. Optimized. **Stable Market Operations**.

Like a smooth spaceflight — steady course, no turbulence, just **cruising to the moon**.

While we enjoy the view from orbit, we'll wave down at the frogs and dogs scrambling below.

## LP MANAGEMENT — \$TWO ENSURE STABILITY

At launch, only 2B \$TWO is added to the Uniswap liquidity pool—enough to ensure accessibility for everyone without handing control to the whales.

38B \$TWO remains in the Uniswap Fund as an operational reserve, added gradually based on market conditions, community activity, and, of course, Elon Musk's tweets.

60B \$TWO is locked in a smart contract, released in three tranches over 3, 6, and 12 months.

### **The Fear: Is This a Rug Pull?**

We get it. 38B in reserve might look suspicious. The nightmare scenario? A massive dump, crashing the price.

It's happened before—owners holding the majority of a meme coin, only to nuke their own community for a payday.

But \$TWO isn't that story.

We've watched the failures. We've studied the crashes. No project escapes extreme price swings.

We can't eliminate volatility, but we can control how liquidity is managed.

Instead of flooding the market all at once, we're adding tokens gradually, ensuring that growth is organic, sustainable, and resistant to manipulation.

### **No Hidden Wallets. No Backdoor Withdrawals.**

We don't siphon tokens to hidden wallets—everything stays in the fund.

We only use these funds for liquidity support—check the blockchain yourself.

This is the only fund under direct manual control—because in the early days, reaction speed matters.

We know that our project isn't just a red flag—it's a live grenade in their cozy world of illusions.

We've kicked the hornet's nest, and attacks on \$TWO are inevitable.

But we won't just sit back and watch. We'll answer.

## CONTROLLED FIRE: THE \$TWO BURN PLAN

\$TWO doesn't just sit around collecting dust—we play by different rules.

The Burning Function isn't just a gimmick; it's a carefully engineered mechanism to fuel scarcity, strengthen market dynamics, and reward long-term holders. And it's coming exactly when it should.

### **Phase One: Controlled Expansion.**

At launch, liquidity is king. We ensure accessibility, organic growth, and market resilience. That's why we don't rush burns from day one. First, we grow. Then, we burn.

### **Phase Two: The Burn Ignites.**

Four months in—when the community is strong, and the market cap is surging—the Burning Function activates automatically. The details? Simple: strategic, market-driven burns to fuel momentum, increase scarcity, and keep the fire alive.

### **If you don't like what we're doing — don't wait four months.**

Buy \$TWO now, burn it.

But know this: We're not here to disappear. We're here to dominate.

Supply is finite. The fire is real.

The longer you hold, the hotter it gets.

## HOLDERS REWARD\$: \$TWO REWARD LOYALTY

Long-term holding is more than just a strategy—it's a statement.  
It says: "I'm not here for quick gains. I'm here to shape the future".

Our 12B staking and rewards fund—named in honor of Hodor, symbolizing loyalty and unwavering commitment—rewards precisely this dedication.  
Unlike competitors hiding behind vague promises, \$TWO sets the bar high for transparency and fairness.

### **Potential Risks & How We Crush Them.**

- Farming Abuse? Big wallets splitting balances? Nice try. They'll end up empty-handed.
- Pump-and-Dump Speculators? Buying right before snapshots? No chance. Genuine holders claim what's theirs.
- Reward Uncertainty? Forget guessing games—rewards are clear, proportional, and transparent.

### **Snapshot-Based Reward System.**

Initial balances lock in on March, 2025.  
At 3, 6, and 12 months, we re-check balances.  
Selling or moving tokens? You're out. Only true holders qualify.  
Rewards depend on balance and duration held. Splitting wallets? Pointless.

### **How Exactly Does it Work?**

Each reward round draws from the transparent 12B fund.  
Exact amounts depend solely on qualifying holders. More commitment = greater rewards.

- Trying to game the system last-minute? Wallet stays empty.
- Real commitment? Your loyalty pays off—literally.

### **Bottom Line.**

\$TWO isn't rewarding passive holders—it's building an elite club.  
Those who build instead of chase, those who hold instead of flip—these are our people.

Holding \$TWO isn't passive. It's a statement. Make it loud.

FOR HIM.
